# Engineering Tomorrow

Danfoss engineers technologies that enable the world of tomorrow to do more with less. We meet the growing need for **infrastructure**, **food** supply, **energy** efficiency and **climate**-friendly solutions. Our products and services are used in areas such as refrigeration, air conditioning, heating, motor control and mobile machinery. We are also active in the field of renewable energy as well as district heating infrastructure for cities and urban communities. Our innovative engineering dates back to 1933 and today Danfoss is a world-leader, employing 22,500 employees and serving customers in more than 100 countries. We are still privately held by the founding family.
